Core factors influencing research utilization

- **Research process**
 - e.g. relevance of research questions
 - credibility of research team
 - translation into recommendations
 - potential public health impact of findings

.....
- **Stakeholders involvement**
- **Communication**
- **Macro-contextual factors**

Where am I?

You must be a researcher

Because what you told me is absolutely correct but completely useless

Yes, how did you know?

You're 30 metres above the ground in a balloon

Yes. How did you know?

You must be a policy maker

Because you don't know where you are or where you're going, and now you're blaming me....

Sexual and reproductive health is essential part of health and well-being through the life-course

2016

...

The WHO European Region is a region in which all people, regardless of sex, age, gender, sexual orientation, gender identity, socioeconomic condition, ethnicity, cultural background and legal status, are enabled and supported **in achieving their full potential for sexual and reproductive health and well-being**; a region where their human rights related to sexual and reproductive health are respected, protected and fulfilled; and a region in which countries, individually and jointly, work towards **reducing inequities** in sexual and reproductive health and rights.

Birth rates and induced abortion rates among 15- to 19-year-old women in Estonia
