

INTERNSHIPS

Engineering Technology students

CORPORATE INTERNSHIP

In a nutshell

- Internship assignment is of a sufficiently high scientific-technical level and is in line with the activities of an engineer (industriële ingenieur) within the company or organisation.
- On a voluntary basis or as part of the curriculum.
- If part of the curriculum, the internship has a duration of (min.) 90 or 180 hours (3 or 6 credits) of which max. 10 hours may be spent on writing the report.
- As one consecutive period or in several blocks.
- Usually during the period July-September but during the academic year is also possible.
- At home or abroad.
- Unpaid (with or without an expense allowance) or paid.
- Under the supervision and follow-up of an academic supervisor and, at the workplace, of a company internship mentor.
- Students keep a concise logbook.
- Students write a final report no later than 2 months after the end of the internship, between 2.000 and 5.000 words and separate from any master's thesis in the company.

The Faculty of Engineering and Architecture is grateful to companies and organisations for their commitment and confidence in its students!
