

How to generate a new stack of slices at a different orientation:

- 1- load your stack of slices
- 2- open the transform editor in the data properties
- 3- choose the new orientation of your slices
- 4- attach the module Compute>ApplyTransform to the data object in the pool
- 5- select the interpolation you want to apply and press the Apply button
- 6- the resulting data object can be saved in AmiraMesh, Dicom, ... formats
